Subject: Addendum to Sediment and Elutriate Sampling Results  
AES Sparrows Point LNG Terminal and Mid-Atlantic Express Pipeline  
Application CENAB-OP-RMN (AES Sparrows Point LNG & Mid-Atlantic  
Express, LLC/Dredging and Pipeline) 2007-1664  
FERC Docket CP07-62-000 and CP07-63-000

Dear Mr. DaVia:

On behalf of AES Sparrows Point LNG, LLC and Mid-Atlantic Express, LLC (collectively "AES"), we respectfully submit the enclosed documents in further response to the July 3, 2007 Request by ACOE for AES to perform additional sediment and elutriate sampling for the above referenced project. The great majority of the additional sampling information requested by ACOE on July 3 was delivered on September 26, 2007; however, it was noted in the submitted documentation that the results for tributyltin would be delivered as an addendum to the report submitted on September 26. This letter transmits that addendum.

For your convenience, we have revised the tables included with the September 26 transmittal to include tributyltin. In this manner, all of the data is contained in one document. The summary of the analyses is set forth in the text included with the tables. By replacing the tables included with the September 26 transmittal with the text and tables included with this letter, a complete package will result.

If you have any questions regarding the attached materials please do not hesitate to contact me at 716.439.1273 x211.

Sincerely Yours,  
AES Sparrows Point LNG, LLC  
Mid-Atlantic Express Pipeline, LLC
